

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Previously presented) A motion-detecting note holder comprising:
 - a note retention member that retains a non-electronic note;
 - a switch that is actuated by insertion of the non-electronic note into the note retention member;
 - a motion sensor;
 - a note-waiting indicator; and
 - a controller in communication with the switch, the motion sensor, and the note-waiting indicator,wherein, when the switch is actuated, the controller, upon receiving a motion-detection signal from the motion sensor, causes the note-waiting indicator to provide a human-perceptible indication that the note is retained in the note retention member.
2. (Previously presented) The motion-detecting note holder of claim 1, wherein
 - the note-waiting indicator includes a speaker,
 - the controller has a pre-programmed audio segment stored thereon, and
 - upon receiving the motion-detection signal from the motion sensor, the controller causes the audio segment to be played via the speaker.
3. (Previously presented) The motion-detecting note holder of claim 2, wherein the controller prevents the audio segment from being played at least until a preset time period has elapsed.
4. (Previously presented) The motion-detecting note holder of claim 1, wherein
 - the note-waiting indicator includes a light source, and
 - upon receiving the motion-detection signal from the motion sensor, the controller causes the light source to provide a predefined light pattern.
5. (Previously presented) The motion-detecting note holder of claim 4, wherein the controller prevents the light pattern from being provided at least until a preset time period has elapsed.

6. (Previously presented) The motion-detecting note holder of claim 4, wherein
the note-waiting indicator includes a speaker,
the controller has a pre-programmed audio segment stored thereon, and
upon receiving the motion-detection signal from the motion sensor, the controller
causes the audio segment to be played via the speaker.
7. (Previously presented) The motion-detecting note holder of claim 6, wherein the controller
prevents the audio segment from being played at least until a preset time period has elapsed.
8. (Previously presented) The motion-detecting note holder of claim 1, further comprising a
portable housing that contains the note retention member, the switch, the motion sensor, the
note-waiting indicator, and the controller.
9. (Previously presented) The motion-detecting note holder of claim 8, further comprising a
writing implement retention member attached to the housing.
10. (Previously presented) The motion-detecting note holder of claim 8, wherein the housing
defines a supply storage cavity.
11. (Previously presented) The motion-detecting note holder of claim 1, further comprising a
photograph retention member.
12. (Currently amended) A motion-detecting note holder comprising:
a ~~note~~ notepad retention member that retains a ~~non-electronic note~~ notepad;
a switch;
a motion sensor;
a note-waiting indicator; and
a controller in communication with the switch, the motion sensor, and the note-
waiting indicator,
wherein, when the switch is actuated, the controller, upon receiving a motion-
detection signal from the motion sensor, causes the note-waiting indicator to provide a

human-perceptible indication that ~~the~~ a note is waiting on the notepad ~~retained in the note retention member.~~

13. (Original) The motion-detecting note holder of claim 12, wherein
the note-waiting indicator includes a speaker,
the controller has a pre-programmed audio segment stored thereon, and
upon receiving the motion-detection signal from the motion sensor, the controller
causes the audio segment to be played via the speaker.
14. (Original) The motion-detecting note holder of claim 13, wherein the controller prevents
the audio segment from being played at least until a preset time period has elapsed.
15. (Original) The motion-detecting note holder of claim 12, wherein
the note-waiting indicator includes a light source, and
upon receiving the motion-detection signal from the motion sensor, the controller
causes the light source to provide a predefined light pattern.
16. (Original) The motion-detecting note holder of claim 15, wherein the controller prevents
the light pattern from being provided at least until a preset time period has elapsed.
17. (Original) The motion-detecting note holder of claim 15, wherein
the note-waiting indicator includes a speaker,
the controller has a pre-programmed audio segment stored thereon, and
upon receiving the motion-detection signal from the motion sensor, the controller
causes the audio segment to be played via the speaker.
18. (Original) The motion-detecting note holder of claim 17, wherein the controller prevents
the audio segment from being played at least until a preset time period has elapsed.
19. (Currently amended) The motion-detecting note holder of claim 12, further comprising a
portable housing that contains ~~the note retention member~~, the switch, the motion sensor, the
note-waiting indicator, and the controller.

20. (Original) The motion-detecting note holder of claim 19, further comprising a writing implement retention member attached to the portable housing.

21. (Original) The motion-detecting note holder of claim 19, wherein the housing defines a supply storage cavity.

22. (Original) The motion-detecting note holder of claim 12, further comprising a photograph retention member.

23-33. (Canceled)

34. (Currently amended) A motion-detecting note holder comprising:

a ~~note~~ notepad retention member that retains a notepad ~~non-electronic note~~;
a motion sensor;
a note-waiting indicator; and
a controller in communication with the motion sensor and the note-waiting indicator, wherein the controller, upon receiving a motion-detection signal from the motion sensor, causes the note-waiting indicator to provide a human-perceptible indication that ~~the non-electronic~~ a note is waiting on the notepad ~~retained in the note retention member~~.

35. (Original) The motion-detecting note holder of claim 34, wherein
the note-waiting indicator includes a speaker,
the controller has a pre-programmed audio segment stored thereon, and
upon receiving the motion-detection signal from the motion sensor, the controller causes the audio segment to be played via the speaker.

36. (Original) The motion-detecting note holder of claim 35, wherein the controller prevents the audio segment from being played at least until a preset time period has elapsed.

37. (Original) The motion-detecting note holder of claim 34, wherein
the note-waiting indicator includes a light source, and

upon receiving the motion-detection signal from the motion sensor, the controller causes the light source to provide a predefined light pattern.

38. (Original) The motion-detecting note holder of claim 37, wherein the controller prevents the light pattern from being provided at least until a preset time period has elapsed.

39. (Original) The motion-detecting note holder of claim 37, wherein
the note-waiting indicator includes a speaker,
the controller has a pre-programmed audio segment stored thereon, and
upon receiving the motion-detection signal from the motion sensor, the controller causes the audio segment to be played via the speaker.

40. (Original) The motion-detecting note holder of claim 39, wherein the controller prevents the audio segment from being played at least until a preset time period has elapsed.

41. (Currently amended) The motion-detecting note holder of claim 34, further comprising a portable housing that contains ~~the note retention member~~, the motion sensor, the note-waiting indicator, and the controller.

42. (Original) The motion-detecting note holder of claim 41, further comprising a writing implement retention member attached to the portable housing.

43. (Original) The motion-detecting note holder of claim 41, wherein the housing defines a supply storage cavity.

44. (Original) The motion-detecting note holder of claim 34, further comprising a photograph retention member.

45-55. (Canceled)
